DIGITAL CONTENT MANAGEMENT

The evolution of digital technology has vastly impacted the way we communicate, live and work. As organizations shift their communication and business objectives to the digital space, there is a need for agile professionals who understand and can flourish in this rapidly evolving field. The certificate in Digital Content Management is designed to introduce the fundamental concepts and strategy of digital content and technology. Students learn theoretical and technical approaches to user experience, the essentials of compelling visual design, concepts and tools for content creation, tactics for persuasive, effective communication in the digital space, and the social and cultural influence of digital media. All courses are offered evenings and weekends.

The program is aimed at individuals who want to develop their skills in information management, design, technology and creative oversight in the digital space. The certificate is ideal for content creators, editors, writers, social media managers, web producers, educators, startup entrepreneurs and consultants, as well as marketing, advertising, public relations and media professionals.

Certificate Offered
