# Information Design and Strategy, MS Learning Design Specialization

Effective educators design new information in ways that people can engage with, understand, and use. The Learning Design specialization will help prepare educators, corporate training professionals, online learning designers, librarians, and museum professionals to create meaningful and pedagogically sound digital learning experiences.

## About the Final Project

As their final course, students take either the individual research project in an independent study format (thesis research) or the final project class in which students integrate the knowledge they have gained in the core curriculum in a project presented by the instructor. In both cases, students are guided by faculty in exploring the body of knowledge on information design and strategy while contributing research of practical value to the field. The capstone independent thesis project and capstone class project count as one unit of credit.

*Pre-requisite: Students may take one other course simultaneously with MS_IDS 498-DL Capstone Project. All other course requirements must have been completed before the commencement of this course.*
