HEALTH SCIENCES, BS

Curriculum

The Bachelor of Science in Health Sciences degree requires 45 units total, including the major, concentration, elective certificate, and elective and distribution courses.

Students take eight core courses and choose a major concentration in Strategic Management to focus on administration, Public Health to focus on health policy and social issues, or Biology for Health Sciences to enhance existing allied health positions. Health Sciences students also select an elective certificate comprised of four courses from outside of the major.

Program begins Fall 2024.

Core and Major Concentrations

Core Courses
8 core courses in health sciences
