

MINOR REQUIREMENTS

The McCormick School of Engineering offers TGS approved interdepartmental minors (<https://www.mccormick.northwestern.edu/academics/graduate/programs/interdepartmental-minors.html>) that enable students to enhance their credentials and marketability. The minor may only be pursued by McCormick master's students in conjunction with a full-time degree program. For a list of available minors and links to specific minor requirements, visit the Master's with Interdepartmental Minors (<https://www.mccormick.northwestern.edu/academics/graduate/programs/interdepartmental-minors.html>) page on McCormick's website.

Coursework

- Students must complete at least three quality letter-graded course units (ABC, not P/NP or S/U) authorized for graduate credit. Individual minors may require additional courses or specific course requirements. See the descriptions for additional information. The Graduate School allows students to count courses above TGS's 9 course minimum to count towards both the minor and master's degree. Programs may have stricter requirements.
- Students who wish to pursue multiple minors may not count the same coursework for more than one minor.

Minor Awarding

- Minors will only be noted on the student's transcript once the master's degree is conferred. In the event a student does not earn the master's degree, the minor will not be posted.
- Questions should be directed to gradservices@northwestern.edu.
