NEUROBIOLOGY &
PHYSIOLOGY (NEUROBIO)

NEUROBIO 401-0 Introduction to Neurobiology (2 Units)
This course introduces students in the MS Program in Neurobiology to
the basics of modern day neurosciences, and canonical experiments that
provide the foundation of modern day research. This course is currently
not offered.

NEUROBIO 402-0 Advanced Neurobiology and Physiology (2 Units)
This course highlights cutting-edge research in neurobiology through
interactive research lectures and critical discussion of primary literature.
Topics vary annually but include subjects such as sensory neurobiology,
chronobiology, synaptic physiology, and neurodegenerative diseases.

NEUROBIO 499-0 Independent Study (1-3 Units)
Supervised individual work; does not fulfill requirements for thesis
or dissertation. Quarters offered: fall, winter, spring. - SEE DEPT FOR
SECTION AND PERMISSION NUMBERS.

NEUROBIO 595-0 Master’s in Science in Neurobiology Laboratory
Research (1-3 Units)
