CHEMISTRY MAJOR

The major is recommended for students planning careers in chemistry. It is suitable preparation for graduate study in chemistry or medical school and for work as a professional chemist. The curriculum includes related courses in mathematics and physics as well as core courses and a concentration in chemistry.

Students must also complete the Undergraduate Registration Requirement (https://catalogs.northwestern.edu/undergraduate/requirements-policies/undergraduate-registration-requirement/) and the degree requirements of their home school.

Course | Title
--- | ---
CHEM 110-0 | Quantitative Problem Solving in Chemistry
& CHEM 131-0 | and General Chemistry 1
& CHEM 141-0 | and General Chemistry Laboratory 1
& CHEM 132-0 | and General Chemistry 2
& CHEM 142-0 | and General Chemistry Laboratory 2

Concentration Courses
- Areas of concentration draw upon courses within the department as well as in other departments.
- Concentration courses are typically taken during the final year of undergraduate study.
- The concentration areas, along with eligible courses, are:

Biochemistry
Course | Title
--- | ---
CHEM 305-0 | Chemistry of Life Processes
CHEM 314-0 | Bioorganic Chemistry
CHEM 316-0 | Medicinal Chemistry: the Organic Chemistry of Drug Design and Action
CHEM 329-0 | Analytical Chemistry
CHEM 415-0 | Advanced Organic Chemistry
CHEM 432-0 | X-Ray Crystallography
BIOL_SCI 361-0 | Protein Structure and Function

Environmental Chemistry

Self-designed Concentration

If the concentrations above do not meet their interests, students may design a concentration with approval of the director of undergraduate studies in chemistry. A concentration may consist of 2 courses from the areas above or with a common theme.

Honors in Chemistry

 Majors who have done outstanding work in the classroom and research laboratory may be eligible for graduation with honors in chemistry. Students who intend to submit a senior thesis should send an e-mail message (including the name of the research adviser) to the director of undergraduate studies by fall of senior year. To be eligible for honors, a student must meet minimum GPA requirements, engage in original research during at least two quarters of CHEM 399-0 Independent Study, and write a senior thesis on this research. The CHEM 399-0 credits are not required for and do not count toward the chemistry major.

Students whose theses and grades meet department criteria are recommended to the college for graduation with honors. For more information consult the director of undergraduate studies and see Honors in the Major (https://catalogs.northwestern.edu/undergraduate/arts-sciences/#academicoptionstext).

Honors Program in Medical Education

Students Chemistry majors who are also participating in the HPME program (https://catalogs.northwestern.edu/undergraduate/dual-graduate-undergraduate-degrees/honors-program-medical-education/) are permitted two waivers in their major. Only one of these waivers may be used for a core program course; the second waiver may be used for a concentration course.
