INTEGRATED MARKETING COMMUNICATIONS

The Integrated Marketing Communications Certificate Program focuses on effective marketing communications strategies and tactics for an increasingly digital media environment. It prepares students for entry-level marketing communications positions in such fields as advertising, public relations, corporate communications, and database and social media marketing.

Students develop skills for understanding and analyzing consumers in traditional markets and newly forming digital communities and social networks. They learn how to conduct research and analyze data on consumer behavior, media usage, and marketing communications outcomes. Students also learn about message creation and delivery through a wide variety of media channels.

The IMC Certificate Program invites applications from students in any undergraduate school at Northwestern. As described on the Medill website, to qualify for admission students must complete 3 prerequisite courses and earn a minimum cumulative GPA of 2.7 in them. Students must earn a cumulative GPA of 3.0 in the five IMC courses to achieve the certificate. Students who receive the undergraduate IMC certificate and are admitted into the MSIMC program can complete the master’s program and graduate in just four quarters, rather than the five quarters required for students without the certificate.
